

**In the Specification:**

Replace the paragraph on page 4, lines 6-16 with the following:

In the embodiment example illustrated by Figures 2, 3, and 4, the frame 19, of 16/9 format, comprises a pair of short sides 7-9 and a pair of long sides 97. The long and short sides have, for example, L-shaped cross-sections and flat parts 37, 39, respectively, substantially parallel to the surface of the mask, which the frame is intended to hold under tension. With the mask 8 being held under tension by being welded to the end 20 of the long sides of the frame, mechanical tension on the mask is maintained by the short sides which have to have sufficient rigidity.
